

Hannah Clarke

Design Systems & Frontend Platform Engineer

Manchester, UK · hc.hannahclarke@gmail.com · linkedin.com/in/hannah-clarke · github.com/hannahmclarke

SUMMARY

Frontend engineer specialising in design systems and developer platforms. I work a layer below the visible component catalogue — on the build, release, testing and tooling that decide whether a design system is genuinely adoptable — and, increasingly, on the AI tooling that helps engineers and designers stay on-system. I came into engineering from nearly a decade in widening-access education, and care about widening that door for others.

CORE SKILLS

Languages & frameworks: TypeScript, JavaScript, React (18 & 19), Next.js (SSR), Stencil / Web Components, Node.js, Python

Design systems: component & icon libraries, design tokens, SCSS, Storybook, Chromatic, accessibility

Build & release: npm-workspaces monorepos, Rollup, Vite, Changesets, package publishing, CI/CD (Azure Pipelines)

Testing: Vitest, Jest, Playwright, Puppeteer, visual-regression & interaction testing

AI & developer experience: Anthropic SDK, Claude Agent SDK, Model Context Protocol (MCP), AI coding guardrails, Slack bots, scaffolding CLIs

Cloud & infra: Azure (App Service, Pipelines, CDN), AWS, Terraform

EXPERIENCE

UI Engineer, Design System · Intapp

Jul 2024 – Present

Core engineer on a code-driven design system serving multiple product teams — web-components-first (Stencil), shipped as React 18, React 19 (SSR) and styling packages. Second-largest contributor.

- Own much of the build & release engineering: migrated the monorepo from pnpm to npm workspaces, stood up CI/CD on Azure Pipelines, and retired the legacy Jenkins pipeline.
- Introduced visual-regression testing (Chromatic) and the React end-to-end / Storybook interaction testing setup.
- Built net-new components end-to-end (e.g. Radio Button Group) across Stencil, generated React wrappers, SCSS, tests and Storybook stories.
- Run the release cadence — versioning, changelogs and the Storybook documentation platform.
- Built the AI developer-tooling layer: design-system coding guardrails (custom ESLint plugin + AI-agent hooks), reusable upgrade tooling, and an AI Slack assistant + autonomous curator agent (Claude Agent SDK + MCP, on Azure).
- Co-built a scaffolding CLI that bootstraps new projects pre-wired with the design system, CI/CD and AI coding context.

Frontend Developer · Immersive Labs

Dec 2021 – Feb 2024

- Web Frameworks team — developed the company's design system and drove accessibility compliance across the platform.
- Earlier on the Cyber Ranges team with TypeScript, React and Node.js, with working knowledge of AWS infrastructure.

Software Engineer · Veygo

Sep 2019 – Dec 2021

- Full-stack development with TypeScript, React, React Native, Python/Django, AWS and Terraform.
- Front-end focus with an emphasis on testing (React Testing Library, Jest, Cypress) and the Storybook component library.

Widening Participation & Outreach · Aberystwyth University

2010 – 2019

- Nearly a decade in widening-access education before moving into software — designing and delivering STEM outreach and managing projects and student teams.

SPEAKING & WRITING

- "An Uncomfortable Place" — talk, ffconf 2025 (Brighton): shipping framework-agnostic component packages with web components & Stencil.
- "Your Design System is more than a UI library" — talk, Natter, Manchester (2026): bridging design and code; extending a design system with a scoped AI assistant.
- "Lasting Design System Infrastructure" — guest on *The Question* podcast with Ben Callahan (2026).
- "Solid foundations or shaky ground?" — article, zeroheight blog: the essential role of infrastructure in design-system code.
- Taught a Code First Girls intro to Python; delivered a free online course on Storybook for React; panels on women in tech and career-changing.

EDUCATION

BSc (Hons) Computing — First Class

The Open University · 2019–2025

MSc, Glaciology

Aberystwyth University · 2011–2013

BScEcon (Hons), International Politics

Aberystwyth University · 2008–2011

Beginners HTML/CSS Web Development

Code First Girls · 2018

LANGUAGES

English (native) · German, Welsh, French (elementary)
